Subject: Microsoft Settlement

Ms. Renata B. Hesse
Antitrust Division
United States Dept. of Justice
Washington, D.C.

Dear Ms. Hesse,

I am very concerned about the proposed Microsoft settlement because I do not believe that it is in the public interest. We, the consumers, need competition and choice so that we can decide for ourselves what products we want on our computers, and we need to be able to combine non-Microsoft products with Microsoft products on our computers. Also, the current proposed settlement leaves too many loopholes for Microsoft to exempt itself from crucial provisions. Thirdly, the court must hold public proceedings under the Tunney Act so that citizens, consumer groups, customers, and Microsoft's competitors can equally participate.

Thank you for considering my comments and input.

Sincerely,

Elizabeth M. Munsat
